### **DETAILED ACTION**

1. This action is in response to the amendment filed on 1/3/2008.
2. Claims 1, 4, 5, 1, 14 and 15 are allowed.

### ***EXAMINER'S AMENDMENT***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Seema M. Mehta (Reg. No. 56,235) on 1/18/08. The examiner's amendment is necessitated for further clarifying the claimed invention.

Claims 1-3 and 11-13 have been amended as follow:

1. A method for authenticating software downloaded in a terminal, said method comprising:

Authenticating, by a first certificate, said downloaded software using a first integrated software in said terminal;

Authenticating said first integrated software using an authentication software module associated with said downloaded software during execution of said downloaded

software, wherein said first integrated software is authenticated using a second certificate;

Wherein the first integrated software authenticates the downloaded software using an authentication library and the first certificate, wherein the first integrated software and the authentication library form a first part of write-protected memory, and wherein the downloaded software and the first certificated form a second part of loadable memory; and

Wherein the first part of the write-protected memory further comprises the second certificate, wherein the second part of loadable memory further comprises verification software, and wherein, once the downloaded software has been authenticated, the verification software authenticates the first integrated software using the authentication library and the second certificate.

Claims 2 and 3 have been canceled.

11. A computer system, comprising:

A processor; and

A memory comprising a first part and a second part, wherein the first part is write-protected and the second part is loadable memory,

Wherein the first part comprises a first integrated software, an authentication library, and a second certificate,

Wherein the second part comprises downloaded application software, a first certificate, and a verification software,

Wherein the computer system further comprises integrated software instructions that, when executed by the processor, are configured to:

Authenticate, by the first certificate, said downloaded application software using the first integrated software;

Authenticate said first integrated software using an authentication software module associated with said downloaded application software during execution of said downloaded application software, wherein said first integrated software is authenticated using a second certificate;

Wherein the first integrated software authenticates the downloaded application software using the authentication library and the first certificate; and

Wherein, once the downloaded application software has been authenticated, the verification software authenticates the first integrated software using the authentication library and the second certificate.

Claims 12 and 13 have been canceled.

***Examiner's Statement of Reason(s) for Allowance***

4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record, i.e. Scheifler et al. (US 6,901,518), taken alone or in combination with other prior art fails to teach or reasonably suggest *wherein the first integrated software authenticates the downloaded software using an authentication library and the first certificate, wherein the first integrated software and the authentication library form a first part of write-protected memory, and wherein the download software and the first certificate form a second part of loadable memory, wherein the first part of the write-protected memory further comprises the second certificate, wherein the second part of loadable memory further comprises verification software, and wherein, once the downloaded software has been authenticated, the verification software authenticates the first integrated software using the authentication library and the second certificate* as recited in the independent claim 1. Similar concept are found in claim independent claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
